LRB102 03478 CPF 38647 a

1 AMENDMENT TO HOUSE BILL 1462

2 AMENDMENT NO. _____. Amend House Bill 1462 by replacing
3 everything after the enacting clause with the following:

4 "Section 1. Short title. This Act may be cited as the
5 Prescription Drug Affordability Act.

6 Section 5. The General Assembly finds that:

7 (1) Prescription drugs are an essential part of good
8 health care and a critical component of our health care
9 system. Illinoisans spend \$13,000,000,000 each year on
10 prescription drugs and have a vested interest in ensuring they
11 are affordable. People living with chronic conditions need
12 prescription drugs to function and stay healthy. Their quality
13 of life is dependent on them. Access to prescription drugs can
14 be the difference between life and death.

15 (2) Illinoisans have faced increasing challenges in
16 affording the prescription drugs they depend upon to be

1 healthy. The costs of brand name drugs have increased 60%
2 since 2014 and annual cost increases regularly outpace medical
3 inflation.

4 (3) Affordability challenges have led more and more
5 Illinoisans to skip doses of prescribed medication and
6 otherwise ration their medication. An estimated 46,000,000
7 Americans have skipped or rationed their medications due to
8 cost, sometimes leading to serious medical complications.

9 (4) The increase in prescription drug costs is the leading
10 driver of increases in health insurance premiums. High
11 prescription drug costs raise State costs under Medicaid and
12 the State Employee Group Insurance Program, raise employer
13 benefits costs, and are passed onto individuals and families.

14 (5) It is the traditional role of State government to
15 protect the health, safety, and welfare of its residents.
16 Illinois has a long history of ensuring services and products
17 essential to life and health, such as clean water and
18 electricity, are affordable. The State has a compelling reason
19 to ensure prescription drug costs balance consumer access and
20 returns for industry.

21 (6) The current system is causing affordability challenges
22 for those who depend on insulin. The average cost of insulin
23 tripled from 2002 to 2013, and one out of every 4 individuals
24 living with diabetes has had to ration his or her insulin due
25 to cost. This can lead to serious complications including
26 kidney failure, heart disease, blindness, amputations, and

1 death.

2 (7) The current system is causing affordability challenges
3 for those who need prescription drugs to treat multiple
4 sclerosis (MS). Early and ongoing treatment with a
5 disease-modifying therapy for MS is the best way to modify the
6 course of the disease, prevent accumulation of disability, and
7 protect the brain, yet many people cannot access the
8 medications they need. It is estimated that 40% of those
9 living with MS skip doses of medications due to cost. These
10 medications routinely cost \$80,000 per year or more and have
11 increased five-fold since they first came to market in the
12 1990s.

13 (8) The current system is causing affordability challenges
14 for those who need prescription drugs to treat cancer.
15 Prescriptions to treat cancer routinely cost more than
16 \$100,000 per year. The incremental increase in cost for a
17 course of treatment increased from \$30,447 in 2006 to \$161,141
18 in 2015. Cancer survivors are 2.7 times more likely to file for
19 bankruptcy than those who have not been diagnosed with cancer.

20 (9) The current system is causing affordability challenges
21 for those who need prescription drugs to treat rheumatoid
22 arthritis. Medications to treat rheumatoid arthritis increased
23 70% in only 3 years. The initial cost of rheumatoid arthritis
24 medication was \$10,000 per year when it was first introduced,
25 but has increased to \$40,000 per year despite several
26 alternatives coming to market.

1 (10) And yet, some extremist politicians in Washington,
2 D.C., including several representatives of the Illinois
3 delegation, have shamefully blocked efforts to control
4 prescription drug prices, choosing pharmaceutical profits over
5 patient care.

6 (11) The State and its residents are facing numerous
7 affordability challenges across many classes of drugs. The
8 current system has not produced affordable costs. An Illinois
9 Prescription Drug Affordability Board that can review multiple
10 classes of drugs across the supply chain is therefore
11 necessary to determine how best to deliver prescription drug
12 costs that are affordable to all Illinoisans.

13 Section 10. Definitions. In this Act:

14 "Biologic" means a drug that is produced or distributed in
15 accordance with a biologics license application approved under
16 42 U.S.C. 447.502.

17 "Biosimilar" means a drug that is produced or distributed
18 in accordance with a biologics license application approved
19 under 42 U.S.C. 262(k) (3).

20 "Board" means the Prescription Drug Affordability Board.

21 "Brand name drug" means a drug that is produced or
22 distributed in accordance with an original new drug
23 application approved under 21 U.S.C. 355(c). "Brand name drug"
24 does not include an authorized generic drug as defined by 42
25 CFR 447.502.

1 "Council" means the Prescription Drug Affordability
2 Stakeholder Council.

3 "Generic drug" means:

4 (1) a retail drug that is marketed or distributed in
5 accordance with an abbreviated new drug application,
6 approved under 21 U.S.C. 355(j);

7 (2) an authorized generic drug as defined by 42 CFR
8 447.502; or

9 (3) a drug that entered the market before 1962 that
10 was not originally marketed under a new drug application.

11 "Manufacturer" means an entity that:

12 (1) engages in the manufacture of a prescription drug
13 product; or

14 (2) enters into a lease with another manufacturer to
15 market and distribute a prescription drug product under
16 the entity's own name; and

17 (3) sets or changes the wholesale acquisition cost of
18 the prescription drug product it manufactures or markets.

19 "Prescription drug product" means a brand name drug, a
20 generic drug, a biologic, or a biosimilar.

21 Section 15. Prescription Drug Affordability Board.

22 (a) There is established a Prescription Drug Affordability
23 Board. The purpose of the Board is to protect State residents,
24 State and local governments, commercial health plans, health
25 care providers, pharmacies licensed in the State, and other

1 stakeholders within the health care system from the high costs
2 of prescription drug products. The Board is a public body and
3 is an instrumentality of the State. The Board is an
4 independent unit of State government. The exercise by the
5 Board of its authority under this Act is an essential
6 function.

7 (b) The 5 members of the Board and 5 alternates shall be
8 appointed by the Governor with the advice and consent of the
9 Senate. The Governor shall select one member to serve as
10 Chair. If the Senate is not in session when the first
11 appointments are made, the Governor shall make temporary
12 appointments as in the case of a vacancy. No Board seat shall
13 remain vacant more than 60 consecutive days.

14 (c) The Board members and alternates must collectively
15 have expertise in health care economics and clinical medicine.
16 A member or an alternate member may not be an employee of, a
17 board member of, or a consultant to a manufacturer or trade
18 association for manufacturers.

19 (d) Any conflict of interest, including whether the
20 individual has an association, including a financial or
21 personal association, that has the potential to bias or has
22 the appearance of biasing an individual's decision in matters
23 related to the Board or the conduct of the Board's activities,
24 shall be considered and disclosed when appointing members and
25 alternate members to the Board.

26 (e) The term of a member or an alternate member is 5 years.

1 The terms of the members and alternate members shall be
2 staggered.

3 (f) The Chair shall hire an executive director, general
4 counsel, and staff for the Board. Staff of the Board shall
5 receive a salary as provided in the budget of the Board. A
6 member of the Board: (i) may receive compensation as a member
7 of the Board; and (ii) is entitled to reimbursement for
8 expenses.

9 (g) A majority of the members of the Board shall
10 constitute a quorum for the purposes of conducting the
11 business of the Board.

12 (h) Subject to the requirements of this subsection (h),
13 the Board shall meet in open session at least once every 6
14 weeks to review prescription drug product information.
15 Information concerning the location, date, and time of the
16 meeting must be made publicly available in accordance with the
17 Open Meetings Act. The Chair may cancel or postpone a meeting
18 if there are no prescription drug products to review.

19 The Board shall perform the following actions in open
20 session: (i) deliberations on whether to subject a
21 prescription drug product to a cost review; (ii) any vote on
22 whether to impose an upper payment limit on purchases and
23 payor reimbursements of prescription drug products in the
24 State; and (iii) any decision by the Board. The Board may
25 otherwise meet in closed session to discuss proprietary data
26 and information.

1 The Board shall provide public notice of each Board
2 meeting at least 2 weeks in advance of the meeting. Materials
3 for each Board meeting shall be made available to the public at
4 least one week in advance of the meeting. The Board shall
5 provide an opportunity for public comment at each open meeting
6 of the Board. The Board may not make any binding decisions
7 unless this comment period has been provided with a sufficient
8 amount of time. The Board shall provide the public with the
9 opportunity to provide written comments on pending decisions
10 of the Board. The Board may allow expert testimony at Board
11 meetings, including when the Board meets in closed session.

12 Members of the Board shall recuse themselves from
13 decisions related to a prescription drug product and disclose
14 interests if the member, or an immediate family member of the
15 member, has received or could receive any of the following:
16 (i) a direct financial benefit of any amount deriving from the
17 result or finding of a study or determination by or for the
18 Board; or (ii) a financial benefit from any person that owns,
19 manufactures, or provides prescription drug products,
20 services, or items to be studied by the Board that in the
21 aggregate exceeds \$5,000 per year. A disclosure of interests
22 under this paragraph shall include the type, nature, and
23 magnitude of the interests of the member or his or her
24 immediate family member involved. For the purposes of this
25 paragraph, a financial benefit includes honoraria, fees,
26 stock, the value of the member's or immediate family member's

1 stock holdings, and any direct financial benefit deriving from
2 the finding of a review conducted under this Act.

3 A conflict of interest shall be disclosed in advance of
4 the first open meeting after the conflict is identified or
5 within 5 days after the conflict is identified. A conflict of
6 interest shall be disclosed by: (i) the Board when hiring
7 Board staff; (ii) the appointing authority when appointing
8 members and alternate members to the Board and members to the
9 Council; and (iii) the Board when a member of the Board is
10 recused in any final decision resulting from a review of a
11 prescription drug product. A conflict of interest disclosed
12 under this Section shall be posted on the website of the Board
13 unless the Chair of the Board recuses the member from any final
14 decision resulting from a review of a prescription drug
15 product.

16 Members and alternate members of the Board, Board staff,
17 and third-party contractors may not accept any gift or
18 donation of services or property that indicates a potential
19 conflict of interest or has the appearance of biasing the work
20 of the Board.

21 Section 20. Powers and duties of the Board.

22 (a) In furtherance of this Act, the Board shall identify
23 prescription drug products that may create affordability
24 challenges for residents of the State and conduct an
25 affordability review for a minimum of 10 such prescription

1 drug products over the course of a 12-month period. The Board
2 has the authority to set an upper payment limit for such
3 prescription drug products.

4 (b) To the extent practicable, the Board shall access
5 pricing information for prescription drug products by: (i)
6 entering into a memorandum of understanding with another state
7 to which manufacturers already report pricing information; and
8 (ii) accessing other available pricing information.

9 (c) In addition to the powers set forth elsewhere in this
10 Act, the Board may: (i) adopt rules for the implementation of
11 this Act; (ii) enter into a contract with a qualified,
12 independent third party for any service necessary to carry out
13 the powers and duties of the Board; and (iii) exercise any and
14 all other powers necessary or desirable to accomplish the
15 purposes, objectives, and provisions of this Act and to
16 perform its duties under this Act. Unless permission is
17 granted by the Board, a third party hired by the Board may not
18 release, publish, or otherwise use any information to which
19 the third party has access under its contract.

20 Section 25. Prescription Drug Affordability Stakeholder
21 Council.

22 (a) The Prescription Drug Affordability Stakeholder
23 Council is created.

24 (b) The purpose of the Council is to provide stakeholder
25 input to assist the Board in making decisions as required

1 under this Act.

2 (c) The Council shall consist of 25 members appointed 5
3 each by the Governor, the Speaker of the House of
4 Representatives, the Minority Leader of the House of
5 Representatives, the President of the Senate, and the Minority
6 Leader of the Senate, and shall represent the following
7 entities:

8 (1) two representative of a statewide health care
9 advocacy coalition;

10 (2) one representative of a statewide advocacy
11 organization for seniors;

12 (3) one representative of a statewide organization for
13 diverse communities;

14 (4) two representative of a labor union;

15 (5) two health services researchers specializing in
16 prescription drugs;

17 (6) one representative of doctors;

18 (7) one representative of nurses;

19 (8) one representative of hospitals;

20 (9) one representative of health insurers;

21 (10) one representative of the Governor's Office of
22 Management and Budget;

23 (11) one clinical researcher;

24 (12) one representative of brand name drug
25 corporations;

26 (13) one representative of generic drug corporations;

- 1 (14) one representative of employers;
- 2 (15) one representative of pharmacy benefit managers;
- 3 (16) one representative of pharmacists;
- 4 (17) one representative of pharmacologists; and
- 5 (18) five members of the public.

6 (d) The members of the Council shall have knowledge of one
7 or more of the following:

- 8 (1) the pharmaceutical business model;
- 9 (2) supply chain business models;
- 10 (3) the practice of medicine or clinical training;
- 11 (4) consumer or patient perspectives;
- 12 (5) health care costs, trends, and drivers;
- 13 (6) clinical and health services research; or
- 14 (7) the State's health care marketplace.

15 (e) From among the membership of the Council, the Board
16 chair shall appoint 2 members to be co-chairs of the Council.

17 (f) The term of a member is 3 years. The initial members of
18 the Council shall serve staggered terms.

19 (g) A member of the Council may not receive compensation
20 as a member of the Council, but is entitled to reimbursement
21 for travel expenses.

22 (h) The Board shall ensure Council membership in
23 accordance with this Section and may deny appointment if
24 appointees do not comply. No Council seat shall remain vacant
25 more than 60 consecutive days.

1 Section 30. Drug cost affordability review.

2 (a) The Board shall identify the following prescription
3 drug products and determine whether each identified
4 prescription drug product should be subject to a cost review
5 as described in subsection (e):

6 (1) brand name drugs and biologics that, as adjusted
7 annually for inflation in accordance with the Consumer
8 Price Index, have:

9 (A) a launch wholesale acquisition cost of \$30,000
10 or more for a year or course of treatment; or

11 (B) a wholesale acquisition cost increase of
12 \$3,000 or more in any 12-month period, or course of
13 treatment if less than 12 months;

14 (2) biosimilar drugs that have a launch wholesale
15 acquisition cost that is not at least 15% lower than the
16 referenced brand biologic at the time the biosimilar is
17 launched;

18 (3) generic drugs that, as adjusted annually for
19 inflation in accordance with the Consumer Price Index,
20 have a wholesale acquisition cost:

21 (A) of \$100 or more for:

22 (i) a 30-day supply lasting a patient for a
23 period 30 consecutive days based on the
24 recommended dosage approved for labeling by the
25 United States Food and Drug Administration;

26 (ii) a supply lasting a patient for fewer than

1 30 days based on the recommended dosage approved
2 for labeling by the United States Food and Drug
3 Administration; or

4 (iii) one unit of the drug if the labeling
5 approved by the United States Food and Drug
6 Administration does not recommend a finite dosage;
7 and

8 (B) that increased by 200% or more during the
9 preceding 12-month period, as determined by the
10 difference between the resulting wholesale acquisition
11 cost and the average of the wholesale acquisition cost
12 reported over the preceding 12 months; and

13 (4) in consultation with the Council, prescription
14 drug products that may create affordability challenges for
15 the State healthcare system, including patients.

16 (b) After identifying a prescription drug product as
17 required under subsection (a), the Board shall determine
18 whether to conduct a cost review as described in subsection
19 (e) for each identified prescription drug product by:

20 (1) seeking Council input about the prescription drug
21 product; and

22 (2) considering the average patient cost share of the
23 prescription drug product.

24 (c) The information to conduct an affordability review may
25 include any document and research related to the
26 manufacturer's selection of the introductory price or price

1 increase of the prescription drug product, including life
2 cycle management, net average price in the State, market
3 competition and context, projected revenue, and the estimated
4 value or cost-effectiveness of the prescription drug product.

5 (d) A manufacturer shall provide such reports as the Board
6 deems necessary for the Board to conduct an affordability
7 review. The Board shall not unreasonably request information
8 that constitutes proprietary, privileged, or confidential
9 trade secrets under the Freedom of Information Act. Failure of
10 a manufacturer to provide the Board with the information for
11 an affordability review does not affect the authority of the
12 Board to conduct such a review.

13 (e) If the Board conducts a review of the cost and
14 affordability of a prescription drug product, the review shall
15 determine whether use of the prescription drug product that is
16 fully consistent with the labeling approved by the United
17 States Food and Drug Administration or standard medical
18 practice has led or will lead to affordability challenges for
19 the State health care system or high out-of-pocket costs for
20 patients. To the extent practicable, in determining whether a
21 prescription drug product has led or will lead to an
22 affordability challenge, the Board shall consider the
23 following factors:

24 (1) the wholesale acquisition cost for the
25 prescription drug product sold in this State;

26 (2) the average monetary price concession, discount,

1 or rebate the manufacturer provides to health plans in
2 this State or is expected to provide to health plans in
3 this State as reported by manufacturers and health plans,
4 expressed as a percent of the wholesale acquisition cost
5 for the prescription drug product under review;

6 (3) the total amount of the price concession,
7 discount, or rebate the manufacturer provides to each
8 pharmacy benefit manager operating in this State for the
9 prescription drug product under review, as reported by
10 manufacturers and pharmacy benefit managers, expressed as
11 a percent of the wholesale acquisition costs;

12 (4) the price at which therapeutic alternatives have
13 been sold in this State;

14 (5) the average monetary concession, discount, or
15 rebate the manufacturer provides or is expected to provide
16 to health plan payors and pharmacy benefit managers in
17 this State for therapeutic alternatives;

18 (6) the costs to health plans based on patient access
19 consistent with Federal Food and Drug Administration
20 labeled indications and recognized standard medical
21 practice;

22 (7) the impact on patient access resulting from the
23 cost of the prescription drug product relative to
24 insurance benefit design;

25 (8) the current or expected dollar value of
26 drug-specific patient access programs that are supported

1 by the manufacturer;

2 (9) the relative financial impacts to health, medical,
3 or social services costs as can be quantified and compared
4 to baseline effects of existing therapeutic alternatives;

5 (10) the average patient co-pay or other cost-sharing
6 for the prescription drug product in this State;

7 (11) any information a manufacturer chooses to
8 provide; and

9 (12) any other factors as determined by the Board in
10 rules adopted by the Board.

11 (f) If the Board finds that the spending on a prescription
12 drug product reviewed under this Section has led or will lead
13 to an affordability challenge, the Board shall establish an
14 upper payment limit after considering: (i) the cost of
15 administering the drug; (ii) the cost of delivering the drug
16 to consumers; and (iii) other relevant administrative costs
17 related to the drug. The upper payment limit applies to all
18 purchases and payor reimbursements of the prescription drug
19 product dispensed or administered to individuals in the State
20 in person, by mail, or by other means.

21 (g) Any information submitted to the Board in accordance
22 with this Section shall be subject to public inspection only
23 to the extent allowed under the Freedom of Information Act.

24 (h) This Section may not be construed to prevent a
25 manufacturer from marketing a prescription drug product
26 approved by the United States Food and Drug Administration

1 while the product is under review by the Board.

2 Section 35. Remedies. The Attorney General shall have
3 authority to enforce this Act. The Attorney General may pursue
4 any available remedy under State or federal law to accomplish
5 the objectives of this Act. Notwithstanding any other
6 provision of law to the contrary, the Board and its staff shall
7 forward any complaints regarding alleged violations of this
8 Act or any consumer protection law or other law to the Attorney
9 General and work cooperatively with the Attorney General.
10 Nothing in this Section shall be construed to limit the
11 remedies available under State or federal law that provide
12 greater or equal protection to consumers.

13 Section 40. Appeal of Board decisions.

14 (a) A person aggrieved by a decision of the Board may
15 request an appeal of the decision within 30 days after the
16 finding of the Board.

17 (b) The Board shall hear the appeal and make a final
18 decision within 60 days of the hearing.

19 (c) Any person aggrieved by a final decision of the Board
20 may petition for judicial review.

21 Section 45. Prescription Drug Affordability Board Fund.

22 (a) In this Section, "fund" means the Prescription Drug
23 Affordability Board Fund.

1 (b) The Prescription Drug Affordability Board Fund is
2 created. The fund shall be used only to provide funding for the
3 Board and for the purposes authorized under this Act,
4 including any costs expended by any State agency to implement
5 this Act.

6 (c) Any investment earnings shall be retained to the
7 credit of the fund.

8 (d) This Section may not be construed to prohibit the fund
9 from receiving moneys from any other source.

10 (e) The Board shall be established using general funds.

11 Section 50. Report.

12 (a) On or before December 31 of each year, the Board shall
13 submit to the General Assembly a report that includes:

14 (1) price trends for prescription drug products;

15 (2) the number of prescription drug products that were
16 subject to Board review, including the results of the
17 review and the number and disposition of appeals and
18 judicial reviews of Board decisions; and

19 (3) any recommendations the Board may have on further
20 legislation needed to make prescription drug products more
21 affordable in this State.

22 (b) On or before June 1, 2023, the Prescription Drug
23 Affordability Board shall:

24 (1) conduct a study of the operation of the generic
25 drug market in the United States that includes a review of

1 physician-administered drugs and considers:

2 (A) the prices of generic drugs on a
3 year-over-year basis;

4 (B) the degree to which generic drug prices affect
5 yearly insurance premium changes;

6 (C) annual changes in insurance cost-sharing for
7 generic drugs;

8 (D) the potential for and history of drug
9 shortages;

10 (E) the degree to which generic drug prices affect
11 yearly State Medicaid spending; and

12 (F) any other relevant study questions; and
13 (2) report its findings to the General Assembly.

14 Section 55. Term expiration.

15 (a) The terms of the initial members and alternate members
16 of the Prescription Drug Affordability Board shall expire as
17 follows:

18 (1) one member and one alternate member in 2023;

19 (2) two members and 2 alternate members in 2024; and

20 (3) two members, including the Chair of the Board, and
21 2 alternate members in 2025.

22 (b) The terms of the initial members of the Prescription
23 Drug Affordability Stakeholder Council shall expire as
24 follows:

25 (1) eight members in 2023;

1 (2) eight members in 2024; and

2 (3) nine members in 2025.

3 Section 60. ERISA plans and Medicare drug plans. This Act
4 obligates State-sponsored and State-regulated health plans and
5 health programs to limit drug reimbursements and drug payment
6 to no more than the Board-established upper payment limit.
7 Employee Retirement Income Security Act (ERISA) plans and
8 Medicare Part D plans are not bound by decisions of the Board
9 and can choose to reimburse more than the upper payment limit.
10 Providers who dispense and administer drugs in this State to
11 individuals in this State are bound to bill all payers no more
12 than the upper payment limit to the patient without regard to
13 whether or not an ERISA plan or Medicare Part D plan chooses to
14 reimburse the provider above the upper payment limit.

15 Section 97. Severability. If any provision of this Act or
16 the application thereof to any person or circumstance is held
17 invalid for any reason in a court of competent jurisdiction,
18 the invalidity does not affect other provisions or any other
19 application of this Act that can be given effect without the
20 invalid provision or application, and for this purpose the
21 provisions of this Act are declared severable.

22 Section 900. The State Finance Act is amended by adding
23 Section 5.970 as follows:

1 (30 ILCS 105/5.970 new)

2 Sec. 5.970. The Prescription Drug Affordability Board
3 Fund.

4 Section 999. Effective date. This Act takes effect January
5 1, 2023.".
